

varieties, competence & service

Ramona

medium early, red skinned quality ware potato
with firm texture

- nice oval tubers with remarkable intensive red skin
- fine grading, high marketable yield
- very good culinary quality

Ramona

red skinned, medium early quality ware potato

Ramona - red skinned ware quality potato with remarkable external and internal quality

Variety characteristics			
Maturity	medium early	Tuber Tuber shape Eye depth Skin Flesh colour	oval shallow red, smooth deep yellow
Cooking Type (EAPR)	A-B		
Consumption quality	quality ware potato with firm texture and pleasantly intensive flavour		
Yield	good tuber yield in a smooth grading	Resistances Wart disease PCN Potato Virus y (PVY) Common scab	1 Ro 1(9), 3(9), 4(9), 5(9) high - very high medium - high
Youth development	rapid	Sensitivities Spraing Bruising Mechanical damage	low very low - low low - medium
Dormancy	high, good storability		
Growing recommendations			
Site requirements	medium to high demands to soil quality and water supply		
Planting	planting density	~ 45,000 plants/ha (seed size 35/55 mm)	
	planting depth	normal	
	seed preparation	sprouting stimulation short before planting	
	seed dressing	preventive control Rhizoctonia solani is recommended; compatibility of particular active ingredients or products has to be checked	
Fertilization			
Nitrogen	local standard N-supply (160 kg/ha N-supply (incl. soil supplied N _{min} ¹ , incl. organic fertilizer); dose rates above 80 kg N/ha should be split on soils with risk of leaching)		
Phosphorus	100 kg/ha (medium soil supply class; water soluble phosphate to planting)		
Potassium	250 - 300 kg/ha (up 150 kg/ha may be applied as potassium chloride)		
Magnesium	60 kg/ha		

All particulars are based on official variety trials and/or our own experience.
However, as potatoes are natural products we cannot undertake any liability for these details.
